

Smuggler chase in the bath

New: SIKUWORLD police boat with water cannon

On land, in the air, and on the water: Even in the wet element, with the new police boat the SIKUWORLD provides a lot of playing fun. The floating boat, with flashing LED lights and electric siren in bath and paddling pool, chases after the smugglers.

The foam splashes on the bow. The police boat hisses through the water and sets a course for a speeding motor boat. The policemen are chasing smugglers, so they switch on the blue and red flashing LED lights and the electric siren. The smugglers don't heave to, they try to escape from the territorial waters. The only option left to the police is to stop the smuggler's boat using the water canon: Turn on the hose!

For this, water is filled into the tank, and pressure is generated using a plug. The water cannon scores a hit on the boat, and the policemen use the winch and cable to pull the boat towards the police boat. On the stern, a flap is folded out, and the boat is pulled on board. Done it! The smugglers have been captured. The new SIKUWORLD police boat floats and can be powered with popular motors from other system toys, via an adapter. A large buoy is also provided for when the boat is at anchor.

SIKUWORLD police boat in retail from June 2020, RRP EUR 29.99

About siku

Sieper GmbH is a medium-sized company with headquarters in Lüdenscheid, founded in 1921. The company, in its fourth generation of
